

## Bike Bits

TRICK OUT YOUR CYCLING  
KIT WITH THESE ADD-ONS

By Andrew Vontz

### BLACKBURN FLEA LIGHTS

The tiny front and rear Fleas are equipped with four high-intensity LEDs, which run in three modes—bright, low-beam, or blinking. And they come with their own microchargers that work with any standard battery (and even used batteries that appear otherwise dead, as we discovered in a pinch). Genius. \$55 (for pair) @ [blackburndesign.com](http://blackburndesign.com)

### TEAM GARMIN EDGE 705

This all-in-one GPS, heart rate monitor, altimeter, and mileage counter mounts on the stem of your bike as the ultimate training tool. The easy-to-read screen can display street maps and directions as well as topographical maps and trails of your route. You can also store your favorite rides and race against a virtual training partner. \$650 @ [garmin.com](http://garmin.com)

HOW DO YOU PUT COLORADO INTO WORDS?

It just has a way of speaking to you. Come experience Colorado for yourself.

Plan your experience of a lifetime today at [COLORADO.COM](http://COLORADO.COM).

**I CAMELBAK PODIUM CHILL JACKET WATER BOTTLE**

Its ingenious twist-lock bite valve eliminates the need to open and close bottles with your teeth on the fly, but the real reason we love the Podium is its thin layer of internal insulation that keeps up to 21 ounces of liquid cool for four hours on the bike. **\$12 @ camelbak.com**

**I ZEFAL XLIGHT CARBON PUMP**

The same advanced composite engineering that makes 13-pound bikes a reality is also behind the incredibly light Zefal pump. And unlike other cheapos on the market, this 46-gram, 6.5-inch-long pump actually has enough power to refill your tires when a flat derails your roll. **\$70 @ zefal.com**
